Out of hours public power

We are installing out of hours public power at the final three locks this year, this means all of our electro-hydraulic locks will now have the facility for boaters to operate the lock using half power when the lock keeper is not available to help.

When using the out of hours public power please read the instructions displayed on the pedestals carefully. These instructions can also be downloaded at www.visitthames.co.uk/winterworks.

Keep up to date

We send our lock improvement programme to you as early as possible to help you plan your cruising over the winter. However, this programme is subject to change - for the most up to date version, please see www.visitthames.co.uk/winterworks where you will also find the information displayed on a map.

You can get the latest river information before you go boating, call our Floodline on 0845 988 1188. When prompted select option 1 followed by the quick dial number shown below.

River conditions and strong stream	011131
River works and lock closures	011132
River events which impact navigation	011133

You can also view the current river conditions at www.visitthames.co.uk/riverconditions where you can subscribe for email updates.
